-exterpark

Arguably best decking system available with 2 patented innovations

Tradition

We manufacture indoor and outdoor wood floors for 45 years with a firm commitment to:

Quality · Reliability · Innovation

Our floors have been embraced in all kinds of projects in more than 70 countries worldwide, featuring collaborations with internationally known architects such as **Frank Gehry**, **Jean Nouvel**, **Santiago Calatrava** and **Norman Foster**.

R+D+I · Tradition · Experience · Know-How

stimulates us to improve our products and find better solutions to be one step ahead.

1995

We invented and patented the first hidden fastening system clip for decks, named **Exterpark Classic**. This has become today the standard fixing system for most producers worldwide. No more screws on the surface.

2004

Our profile evolved with a subtle modification.

The **invisible profile** for decking was born and patented.

The understructure was not visible, loss of valuables was no longer a concern and our decks became safer and cleaner for the users. Our most spread technology for the time being, enjoyed all around the world.

2012

Was the launching of our third patented innovation. **SpeedClip** was our first contribution to making installation easier, screw-less, definitely faster and cost-efficient.

2014

Our best creation arrived in late 2014.

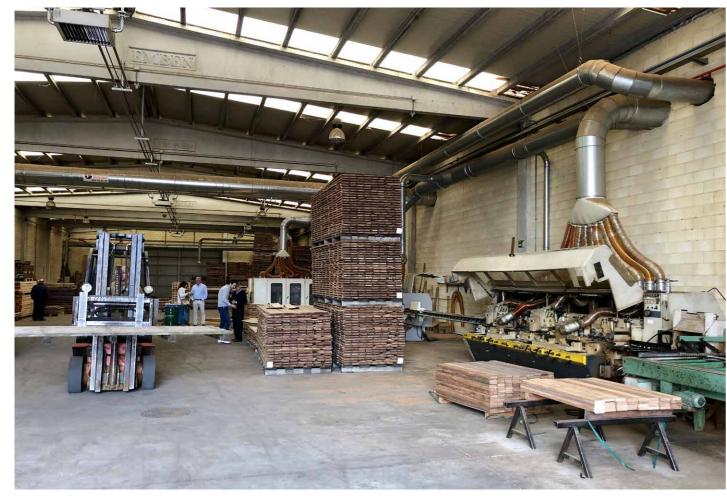

The Magnet is the best system we have ever developed. A system that works for virtually any kind of surface featuring multiple virtues:

Versatility · **Total Accessibility** · **Reusability**

2019

Innovation is our passion: we file a new patent featuring 4 new improvements for the magnet clip which highly upgrade the installation experience as well as the actual clip performance and stability. We launch first chevron and herringbone deck system.

OUR FACTORY - XINZO, OURENSE (SPAIN)

We are in charge of forest management, wood selective cutting, kiln drying, fine manufacturing and finishing. We control the entire value chain.

BENEFIT #1 INVISIBLE PROFILE

BENEFIT #2 ASSEMBLY

STANDARD PROFILE WITH OPEN GAPS VS EXTERPARK INVISIBLE PROFILE

INSTALLATION BENEFITS τhe magneτ®

An advanced **mechanical locking** with superior grip which holds boards stronger than a screw but yet flexible to open up and close again when necessary.

externark

Our Invisible patented profile provides several advantages:

Powered by Välinge

BETTER LOOK Solution No visible gaps nor under structure HYGIENIC No food or other objects can fall down NO LOSS OF VALUABLES → Coins, rings or keys SAFER Nothing can get stuck such as high heels or fingers

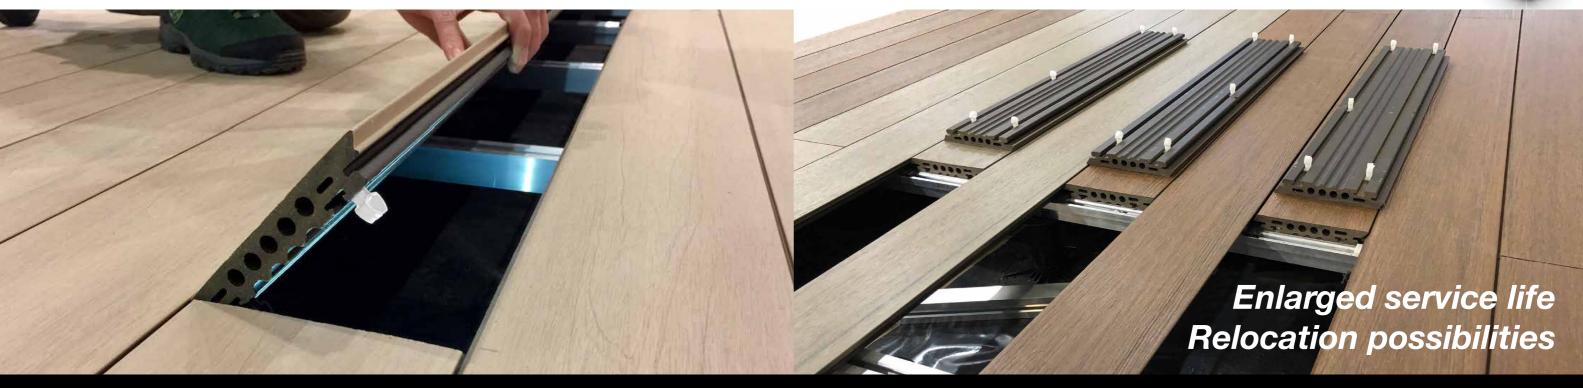

EASY No screws **FAST** No predrilling **SILENT** No tools **COST-EFFICIENT**

BENEFIT #3 ACCESSIBILITY

BENEFIT #4 REUSABLE

TOTAL ACCESS FOR DECKS AND WALLS

THINKING GREEN

Flexibility
Maintenance friendly
Easy substitution of boards

Commitment with the environment

We manufacture using sustainable sources such as **FSC®** certified wood. Furthermore Exterpark Magnet features certain characteristics that provide credits for the green **LEED building certification**.

THE MAGNET SYSTEM WORKS OVER 6 ESSENTIAL ELEMENTS:

- 1. A T GROOVE at the bottom of each board to allocate magnet clips.
- **2. ALUMINUM JOISTS** with a very specific and accurate geometry for the magnet clip to click inside.
- 3. SPACERS between boards to leave 4mm invisible expansion and drainage gap.
- **4. BLOCKING** units to keep all boards always in same place and prevent longitudinal movement.
- 5. PEDESTALS and WEDGES Levelling instruments.

6. THE MAGNET CLIP

- · The corner stone of the system.
- A secret formula combining two types of POM gives us top strength (more than 330km wind lift test) with the right flexibility.
- Low friction coefficient and high abrasion resistance.
- · Withstands -40°C to 90°C.
- · POM is widely used in the automotive and electronic industry.

ALUMINUM JOISTS

• IMPROVED LOADING CAPACITY to more than 4000kgs per m².

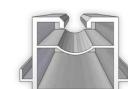

A SOLID ROCK FOUNDATION **ALL SCENARIOS - BUILDING IT FOREVER**

SINGLE 35 x 32 mm

LOW HEIGHT 35 x 15,5 mm

LOW DOUBLE 48 x 15,5 mm

DOUBLE 48 x 32 mm

WALLS and CEILINGS

68 x 17 mm

DETAILS

Comprehensive system with complete solutions

We have created the **double click joist** for the short-end connections, which is a must for the good performance of

There is even a 4 mm spacing mark for the indicative recommended expansion gap essential for Exterpark Tech WPC.

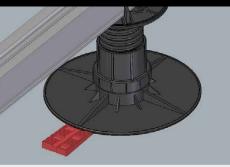

MAGNET INSTRUMENTS

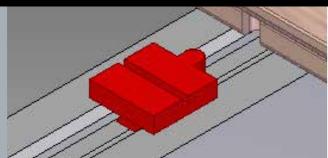

COMPREHENSIVE SYSTEM

Wide range of components to offer the best solution for every project scenario.

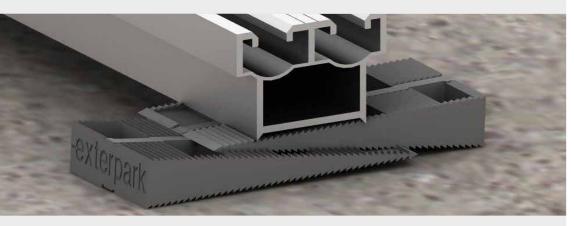

PEDESTALS Height adjustable pedestals

from 5 up to 40 cm.

BLOCKING SPACER

to prevent longitudinal mis-placement of boards and still allow for the required expansion and contraction.

Leveling **WEDGES** from 1 up to 50 mm. Joist low teeth interlock with wedges for a very easy and accurate leveling.

PedesTALL XL from 30 cm up to 1 m.

THE MAGNET CLIP

The biggest thing in decking is really small.

CROSS JOIST

Exterpark latest contribution to a better installation and long lasting deck.

- Substantial time saving when laying down joists at specific span distance. Leave aside measuring tape.
- Total gain in span distance accuracy. Cross joists have the exact span size we need from center to center of our aluminum joists.
- Gain in substructure stability specially when using pedestals. Cross joists will be a key cross beam which will keep same distance among joists and will prevent them from moving.

MAGNET TOOL

Using the **MAGNET TOOL**, any board can be opened up in less than 5 SECONDS:

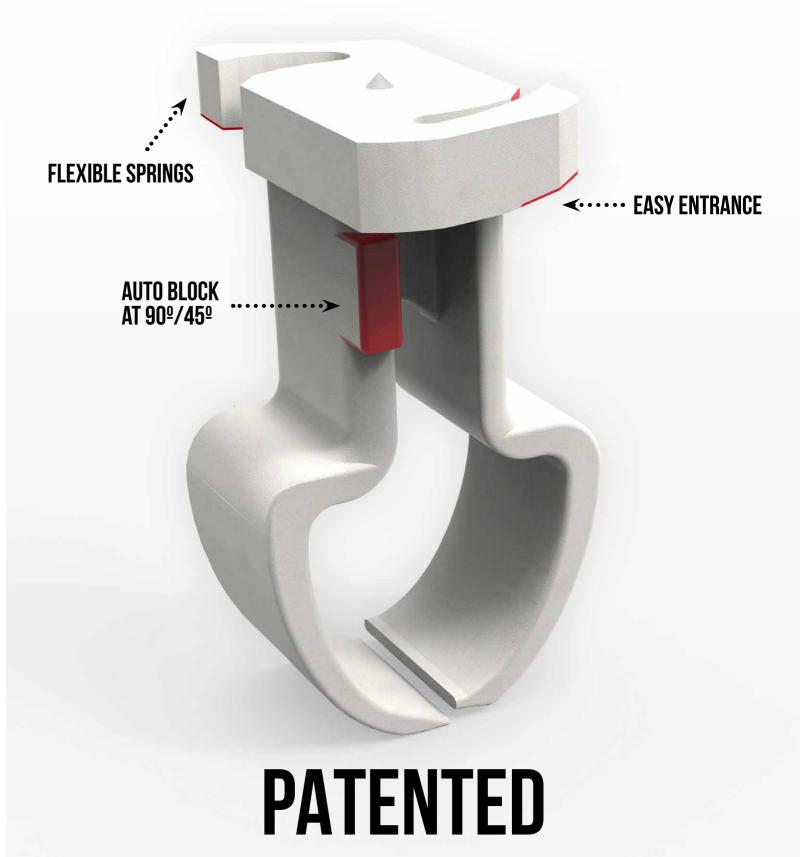

NEW MAGNET CLIP

the magnet $^{\circ}$ DECKING REINVENTED

Fully made of **POM**, a high performance engineering thermoplastic with excellent dimensional stability even at extreme conditions.

4 new patented improvements for the new 2019 magnet clip. First herringbone and chevron deck system invented.
